The Trafolube GmbH recycled with modern and environmentally friendly methods among other things like transformer and turbine oils.

By specializing in a few locations waste oil is a particularly energy-saving and resource saving workup realized.

Many years of experience in the formulation of industrial lubricants coupled with procedural own developments enable the production of high quality products.

In cooperation with logistics companies, we are able to respond quick and flexibly to customer needs.

Also contributes to the convenient location in Duisburg, from where major industrial centers are reach easily

The Trafolube GmbH is looking forward to a partnership and working with you.
